mpleted the required self assessment and has determined that at the end of the third year reporting period the City provisions of the approved NOI, except for the following provisions.

d maintenance agreement: Work in progress as part of year number four work

to implement a citizen storm drain stenciling program utilizing volunteer environmental task force. Efforts will lement this program during reporting year number four

lined in Part III of this report the City has, during the designated reporting period, continued its comprehensive l its combined sewer collection system. The first phase of construction commenced in the fall of 2005. As each of ombined sewer is separated combined sewer overflows and discharges will be reduced. At the end of the third les of combined sewer has been separated and 5 CSO outfall have been eliminated The City continued a storm elected drainage basins . The results of the second year sampling program resulted in the identification of six m drain system. All identified illicit connections were eliminated. Results of the third year of this program nnections that were eliminated.
